

General Description

The TSE-H3800-U is a High Voltage Transformer for insect / bug killers and Ionization application. Because the TSE-H3800-U is a true high voltage Transformer,

It is extremely easy to apply, minimizing design and production costs, and improving time to market.

Applications

- Insect killers
- Industrial / Home Ionization Products

Electrical Characteristics / Features

| | |
|-------------------------|---|
| Primary Input | 120 Voltages, 60Hz \pm 10% |
| Secondary Output | 3800 Voltages, R.M.S. \pm 15% |
| Power | 50 VA (MAX.) |

The attaching page are the most update drawing for the transformer physical dimension.
