

General Description

The TSE-H9000-E is a High Voltage Transformer for insect / bug killers and Ionization application. Because the TSE-H9000-E is a true high voltage Transformer,

It is extremely easy to apply, minimizing design and production costs, and improving time to market.

Applications

- Insect killers
- Industrial / Home Ionization Products

Electrical Characteristics / Features

Primary Input	230 Voltages, 50Hz \pm 10%
Secondary Output	9000 Voltages, R.M.S. \pm 15%
Power	50 VA (MAX.)

The attaching page are the most update drawing for the transformer physical dimension.
